

APOLLO Wireless Systems

Apollo systems represent the pinnacle in robust & reliable wireless remote control systems.

Featuring a modular design, IP rated transmitter / receiver and industry standard internal mosfet switching the Apollo is built to last and perform

- Multivoltage 9 - 36 volts
- 2,4,6,8,10,12 & 16 function models
- 60 meter effective range (no dropout)
- Transmitter neck strap and clear keypad cover included
- Emergency stop button on transmitter and receiver
- Heavy duty oil/dust/water resistant rubber buttons (transmitter)
- Computer programable (interlocks and latching functions)
- European standard internal switches with gold plated connectors
- IP65 rated transmitter and receiver

APOLLO Features

Removable safety key ensures your system is used by who you want when you want

Full function diagnostic LEDs clearly visible on receiver face plate. Receiver mounted EMS button

Large push down Emergency Stop Button allows safe and easy system shutdown from the transmitter

Simple & quick transmitter battery replacement using readily available AA cells
