

SPECTRA LED halfbars

The Spectra LED halfbar provides high visibility emergency lighting with a focus on power, quality and economy.

Designed and manufactured in New Zealand the

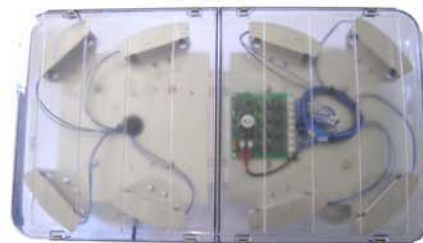

Spectra halfbar is direct derivative of the Spectra full length lightbar designed and manufactured for the New Zealand Police force and arguably the only lightbar in NZ to meet their proprietary testing standards. There's no doubt that if the Spectra's good enough for NZ's most demanding user and conditions it will offer you the longevity, performance and value for money you have been looking for but may have been unable to find.

The perfect choice for quality focussed fleet purchases or individuals with an eye for the long term benefits provided when purchasing the best.

Features

- Muti - volt 9 - 32 volts
- High intensity LED modules x 8
- Very low power consumption
- Dip switch selectable flash patterns
- Custom wide angle LED optic
- Available in bolt mount or magnetic base
- Full alloy base with adjustable feet
- Vari angle LED placement for better 360 degree warning
- Low profile for improved economy and styling
- Full 3 year warranty

Vari angle LED module positioning for improved 360 degree performance

NOT ALL POLYCARBONATE LENS ARE CREATED EQUAL THE SPECTRA USES MAKROLON THE SAME PRODUCT USED IN AUTOMOTIVE HEADLIGHTS. THE ONLY BAR IN PRODUCTION TO DO SO THE SPECTRA OFFERS THE BEST UV RESISTANCE TO DISCOLOURING OF ANY BAR AVAILABLE

Seriously robust aluminium base with foot adjustment allowable along the length of the base
